

Maurizio De Magnis - Resume

I'm a full stack developer, mainly focused on the Web ecosystem.

Nowadays my toolchain is mainly centered around **Ruby** and **Javascript** but I'd like to dig into other cool technologies.

I seek beauty in what I do and I'm a huge fan of **#FreeSoftware #Design #DevOps #InfoSec**.

Some of the companies I developed for over the past decade are:

- [The Fool](#)
- [Prada](#)
- [Mikamai](#)
- [Cayenne](#)
- [IFS Italy](#)
- [Hiperpool](#)
- [Antonioli](#)
- [Buongiorno](#)
- [Glossom](#) (now Arthewall)

I did *frontend dev*, *backend dev*, *web design*, *system administration* and *project management*.

I like agile practices, such as *Scrum* and *Kanban*, whenever they represent a good option.

Since 2011 I mainly work remotely and I try to value face time as much as possible.
